Why Games Are the *Killer App* (http://mashable.com/2010/08/11/social-gaming-business/) for Social Networks:

>>Crafting an initial portfolio is often more challenging than expected.

Great content takes significant skill and resources to build, and attracting quality developers can be difficult for smaller sites. In addition, it's important to realize that many games have a limited shelf life, so new content must be continually added in order to keep a site's social gaming ecosystem vibrant. For these reasons, content acquisition is a critical step that requires ongoing focus and commitment.<<

The knowledge pyramid: a critique of the DIKW hierarchy (http://jis.sagepub.com/cgi/content/abstract/35/2/131)

M Fricke - Journal of Information Science, 2009 - jis.sagepub.com
The paper evaluates the data–information–knowledge–wisdom (DIKW) hierarchy.
This hierarchy, also known as the 'knowledge hierarchy', is part of the canon of **information science**
and management. Arguments are offered that the hierarchy is unsound **...**
