Export your workspace

PBworks can generate a Zip file containing the contents of this workspace. It may take a while for the download to be ready. If your workspace is very large, you may have to download several Zip files to obtain a full export.

Once you generate an export, you will be able to download it for up to one week. You can generate a new export at any time, but you must delete the existing export before you can generate a new one.

Export description	Status

Open USB F:drive WordPad with MS-Word-2010 Version … Use f1 Key for HELP …
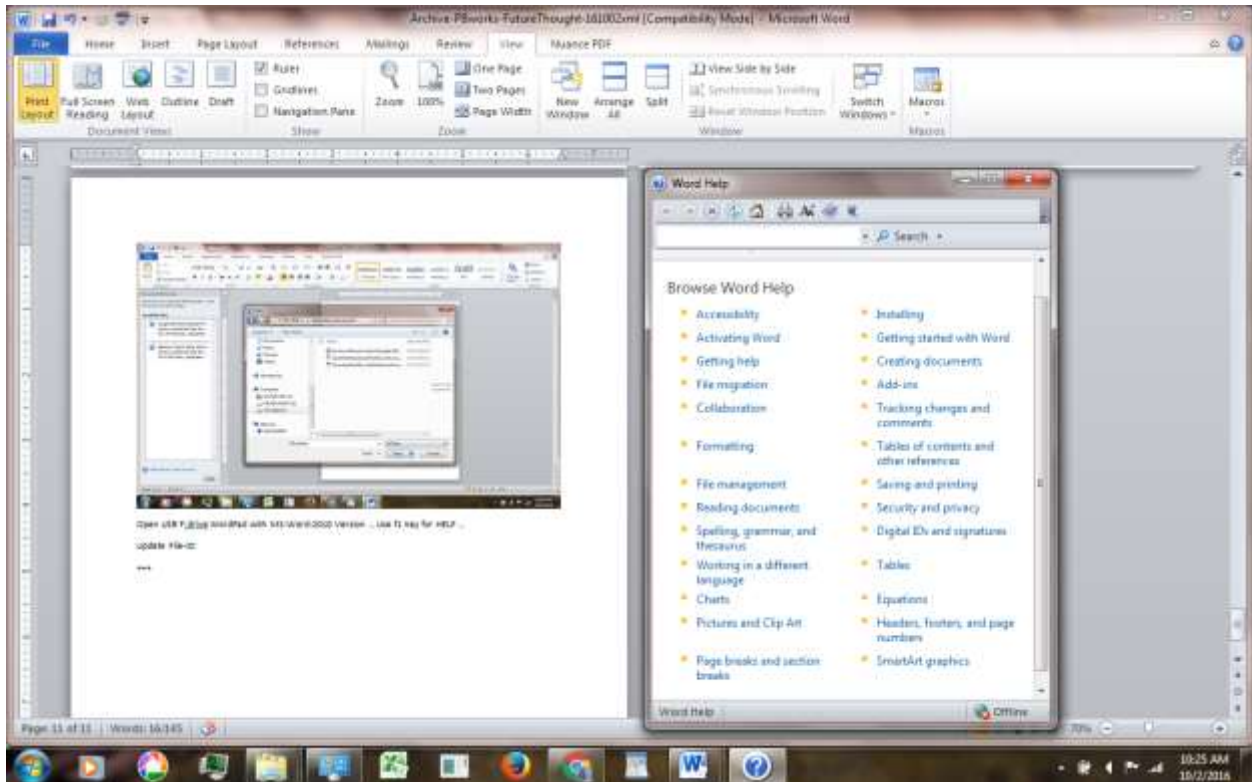

DropBox Folder auto-saves Screen Prints [fn] +[prt sc]

Contact PBworks Support

If the problem of the editor appearing blank persists, even after reverting the FrontPage and the SideBar to the very first version, please contact support immediately through the "Help" link on your workspace. ==Here's a list of things you should tell Support, so we can fully address the problem:==

1. What browser, and what **version of web browser** are you using?
2. Does the editor fail to load on every page, or just specific pages?
3. If you're using **Firefox**, what add-ons are you using?
4. Are you connecting to PBworks through a work or school-owned internet connection?
   Can you try accessing from home and see if the problem comes up?

The ==answers to these questions== will be vital to determining what is wrong with the editor on your pages.
